Bleach Method

* Deal with stains as soon as possible. The faster you act, the more successful the result will be.

Cleaning Steps

01 First remove as much of the foreign material as possible: carefully scrape off thick or sticky material with a spoon, vacuum up crust pieces if it is dry, or blot with a white paper towel if the stain is liquid.

02 Mix a solution of 50% clear household bleach & 50% warm water in a spray bottle. Use clear, pure household bleach containing no additives. Perfumed bleach can also be used.

03 Spray the solution directly onto the rug in the affected area, do not over-wet.

04 Blot the surface, working from the outside of the stain to the centre of the stain to prevent spreading. Repeat this procedure until the stain disappears.

05 Spray with clean water and blot repeatedly until all bleach is removed.

06 Use white absorbent paper towels weighted down with a heavy object to absorb any remaining moisture.

07 When completely dry, lightly vacuum.

What You'll Need

- Spray Bottle
- Clear Household Bleach
- Warm Water
- White Paper Towel
- Vacuum Cleaner
- Spoon/Utensil

Acetone Method

* This method only applies to machine oil stains.

Cleaning Steps

01 Remove as much of the stain as possible by blotting or scraping up.

02 Apply a small amount of pure acetone or nail polish remover to a white cloth and work in gently, do not over-wet.

03 Blot the surface, working from the outside of the stain to the centre of the stain to prevent spreading. Repeat this procedure until the stain disappears.

04 Use white absorbent paper towels weighted down with a heavy object to absorb any remaining moisture.

05 When completely dry, lightly vacuum.

Important Information:
Deal with stains as soon as possible. The faster you act, the more successful the results. Acetone is available at pharmacies.

What You'll Need

- Acetone
- Warm Water
- White Paper Towel
- Vacuum Cleaner
