BIM

What are we offering professionals?

BIM flooring components,

already modelled to include all product specifications:

(ie – size, pattern, colour, thickness, quantification, editability)

What programmes work with these offerings?

All Autodesk based programmes:

Ie: Revit, Autocad, Archicad etc.

L.O.D = *300*
(level of detail)

Modelled Sufficiently for detailed drawings and simple 3d modelling.

Not recommended for final high res-renders.

Benefits of these already modelled BIM components

- Time saving!! ☺
  (all elements already BIM integrated)
- Increased efficiency
- Increased accuracy
- Clash detection
- Improved collaboration
- SQM quantification

HOW TO ACCESS BIM

BIM 4U
BUILDING THE FUTURE

Via the: *https://bim4u.co.za/revit-library/* website

- User can download Belgotex flooring components as/where required.
- Easily links to important Belgotex product documents
- Accessible to all (including students)
- Website Link expires after 6 months
- For non Revit users .RFA/Revit files can be converted by professional as required

Via Autodesk platform (via invite)

- Access for Autodesk licensed users only
- Allows users to work on live drawings with live continuously automated updates on our components
- Direct download of components into professionals' BIM project
  (no need to download & save in another location prior)
