

ProBac is a fundamental shift in carpet backing. It's designed to minimise environmental impact at everystage, from production to installation. ProBac delivers a cleaner, lighter and more efficient alternative without compromising on performance.

What makes ProBac unique?

Sustainability built-in

ProBac is designed to reduce environmental impact, using 75% recycled polyester, requiring less energy to produce, and eliminating high-impact traditional materials.

It has achieved GreenTag certification under the Product Health Declaration (PHD) and has been awarded a Platinum Health Rating.

Pure innovation

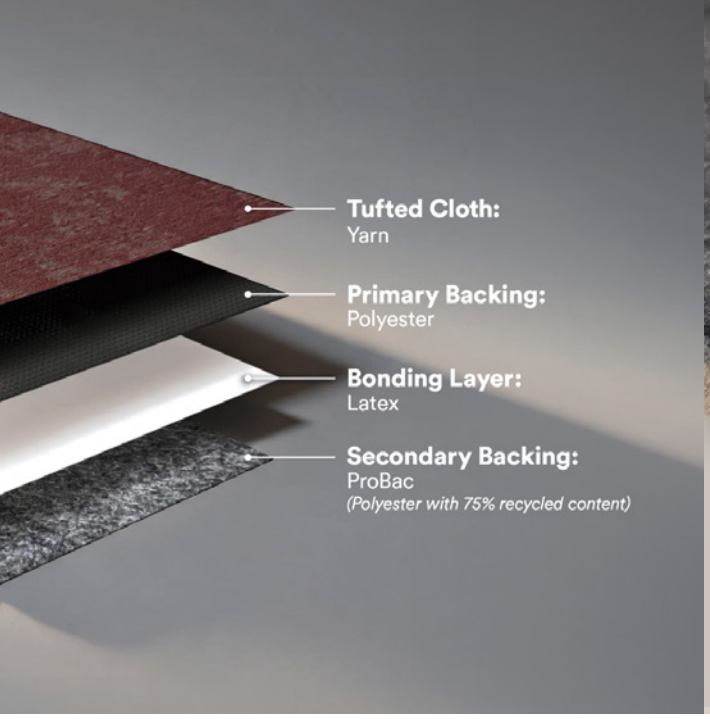

An entire backing system re-engineered – ProBac moves beyond the legacy bitumen-based construction.

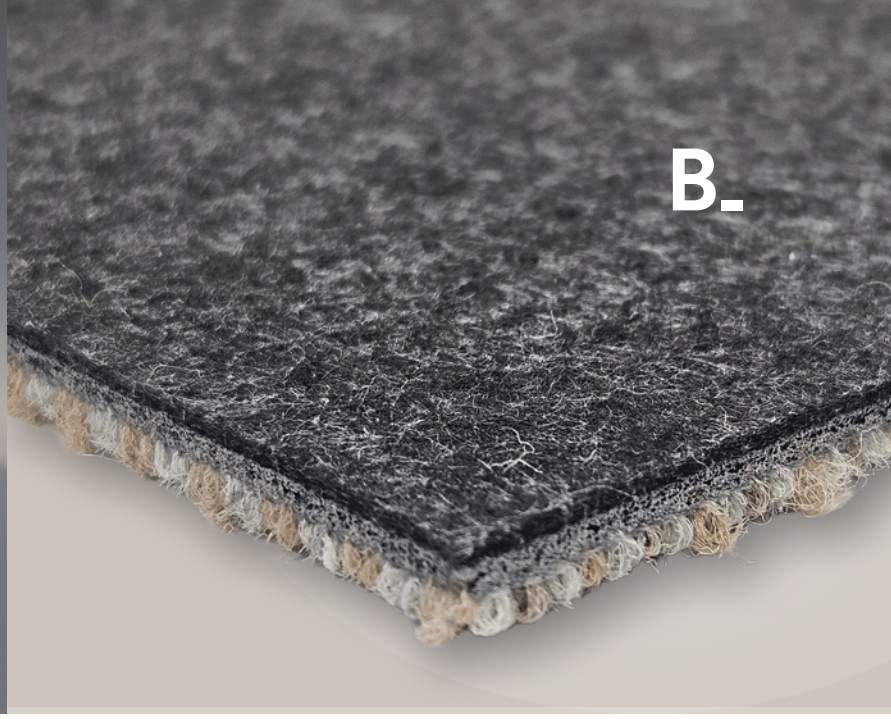

Proven performance

ProBac delivers exceptional durability and dimensional stability, while enhancing acoustic performance with 40% better sound absorption and 30% improved impact sound insulation.

Practical by design

ProBac is 30% lighter than traditional backing, making it smarter to handle and easier to install. Maximising sustainability without compromising performance, ProBac represents next-generation thinking in carpet backing.

Quick-reference specifications

Fibre Composition	Polyester (75% recycled PET (rPET), 25% virgin PET)
Colour	Charcoal
Application	Backing system

Property	Test Method	Units	Value
Mass per unit area	EN 29073-1	g/m²	300 ± 10%
Thickness	ISO5084	mm	2.5 - 3.5
Tensile Strength MD/CMD	ISO 9073-3	N	≥ 350
Elongation at break MD/CMD	ISO 9073-3	%	≥ 40
Width Tolerance	Tape	mm	1060 ± 2% 2550 ± 1%
Length Tolerance	Trumeter	m	200 ± 3%

Designed with our footprint in mind

ProBac uses fewer resources, less energy and more recycled material to create a cleaner, lighter and more efficient alternative to traditional backing without compromising on the carpets performance.

Which means a smarter backing for a lighter footprint.
